Duty of Care

A record of presentations about practicing as an architect that took place on 19 April 2002, by a group of practitioners and educators including Fluid, in which a specific client was used to describe how they practice and to explain to whom a duty of care is owed. The result is that a lateral and wider view of responsibilities emerges. Fluid present their community engagement and regeneration project at Cotmandene Crescent, St Paul's Cray, for the London Borough of Bromley.
